

SURA SANDEEP

Phone no: 6305568944

Email Id: surasandeep17@gmail.com

SUMMARY

Motivated and detail-oriented graduate eager to learn and grow in a dynamic professional rewards innovation, environment. Adaptable and committed to delivering excellent results.

EDUCATION

Kamala Institute of Technology and Science, Karimnagar

Nov2021 - July 2025

Bachelor of Technology

Grade: 6.5

Trinity junior college, Karimnagar

Jun2019 - May 2021

Intermediate

Marks: 950

Sri Gayathri School, Husnabad

Jun2018 - May 2019

Secondary School of Education

Grade: 8.5

ACADEMIC PROJECTS

ELECTROMYOGRAPHY WITH MUSCLE SENSOR AND ARDUINO

Hardware Used: Breadboard, MyoWare muscle sensor, Electrodes, jumper wire

- Electromyography (EMG) measures electrical activity produced by muscles during contraction. Using a muscle sensor with Arduino, you can detect and analyze this activity in real-time. The sensor captures voltage changes on the skin, which are amplified and filtered. Arduino reads these signals via analog input and processes or transmits the data. This setup is useful for prosthetics, rehabilitation, robotics, and gesture control projects.

WATER QUALITY MONITORING AND FORECASTING SYSTEM

Technologies Used: Windows 10, Python, MySQL, PyCharm, Flask

- A water quality monitoring and forecasting system tracks key parameters like pH, turbidity, temperature, and dissolved oxygen. Sensors collect real-time data from water sources, which is processed using microcontrollers or IoT platforms. Data is transmitted to a central system for analysis and storage. Forecasting uses algorithms or machine learning to predict future water conditions. This helps in early detection of pollution, resource management, and ensuring safe water supply.

CERTIFICATIONS

Python FULL Stack Development –LiveTech(4 Months Course)

Python Bootcamp-

- Gained proficiency in Python syntax, data structures, functions, and objectoriented programming, covering core programming concepts.

Embedded System Developer-

- Gained hands-on experience with C/C++ programming for low-level hardware interaction.
- Worked with communication protocols such as I2C, SPI, UART, and CAN for sensor and peripheral interfacing.

SKILLS

Technical skills

- **Programming Languages:** Python, c
- **Web Technologies:** HTML, CSS, JavaScript
- **Frameworks:** Django, ReactJS
- **Database:** MySQL

Soft Skills: Teamwork, Problem-solving,
